Table of Contents

1 INTRODUCTION **1**

1.1 Background 1

1.2 Recharge study 2

1.2.1 Recharge estimation approaches 3

1.3 Study objectives 6

1.4 Previous studies 6

1.5 Geography of study area 10

1.6 Thesis components 10

2 AL AUJA-TAMSEEH GENERAL DESCRIPTION **14**

2.1 Study area 14

2.2 Description of the study area 14

2.2.1 Climate of the Auja- Tamseeh 15

2.2.2 Geology of the area 17

2.2.3 Hydrogeology of the area 20

2.2.4 Hydrology of the study area 22

2.2.5 Soil cover 24

3 METHODOLOGY AND APPROACH **26**

3.1 Data collection 26

3.2 Data Preparation 26

3.3 Methodology and approach 29

3.4 Lag-time and accumulation effect 31

3.4.1 Monthly rainfall analysis 31

3.4.2 Monthly groundwater level analysis 33

3.5 Recharge estimation approach 37

3.6 Annual recharge from rainfall 39
3.7 Rainfall calculations 41
3.8 Monthly recharge estimation 43
3.9 Obstacles faced during the study course 44

4 RECHARGE ESTIMATION 51
4.1 Rainfall Analysis 51
4.1.1 Daily rainfall analysis 52
4.1.2 Monthly Rainfall Data 54
4.2. Recharge Estimation 56

5 CALCULATIONS AND RESULTS 62
5.1 Recharge calculations 62
5.1.1 Areal Rainfall calculation 62
5.1.2 Areal recharge calculation 66
5.2 Model application 67

6 CONCLUSIONS AND RECOMMENDATIONS 69
6.1 Conclusions 69
6.2 Recommendations 71

REFERRENCES 73

ANNEX A 78
ANNEX B 89
