TABLE OF CONTENTS

	Page
Abstract	ii
Dedication	.iv
Acknowledgments	.v
Vita	vi
List of tables	xi
List of figures	. xxi
Chapters	
1. Introduction	1
Importance of the study	1
Need for the study	1
Comparison with current instruments	3
Conceptual definition of terms	7
Operational definition of terms	9
Characteristics of inquiry	10
Instructional/methodological aspects	10
Outcomes resulting from the use of an inquiry approach	13
Scientific inquiry	14
Problem statement	14
Research questions	15
Samples	17
Independent variables	18
Dependent variables	19
Validation procedures	19
Assumptions	22
Limitations of the study	23
Delimitations of the study	23

2. Literature review..... 24

Introduction..... 24
Definitions of inquiry and scientific inquiry..... 25
Inquiry requirements..... 27
Constructivism and inquiry..... 32
Outcomes from using inquiry in science classrooms..... 32
Barriers to teaching science using inquiry approaches..... 34
Comparison between using traditional methods and inquiry methods..... 37
The science teacher and inquiry..... 39
Mathematics and science integration and inquiry..... 41
Importance of science teacher attitudes and beliefs..... 42
Teacher education and inquiry..... 43
Assessment in inquiry classrooms..... 44
Summary..... 45

3. Methods and procedure..... 47

Introduction..... 47
Instrument structure..... 48
Instrument validation procedures..... 54
Content and face validity..... 54
Recommendations from the panel of experts..... 55
Construct validity..... 56
Representative groups..... 56
Assessing construct validity using principal component analyses..... 60
Concurrent validity 65
Determining group differences..... 65
Research questions analyses procedure..... 65
Summary..... 68

4. Results..... 70

Samples 72
Data Analyses..... 75
Item recoding..... 75
Procedures for determining the number of components Retained..... 76
Results of principal components analysis..... 78
Section 2-Importance of inquiry teaching and learning for learning science..... 78

90
Section 3-Teaching experience in using inquiry approaches.....
Section 4-Learning experience through inquiry approaches 102
Section 5-Beliefs about barriers to using inquiry approaches in science classrooms..... 119
Section 6-Beliefs about student outcomes resulting from 124
the use of Inquiry approaches in science classroom..... 135
Section 7-Beliefs about scientific inquiry..... 135
Research questions..... 153
First question..... 160
Second question..... 161
Third question..... 167
Fourth question..... 170
Fifth question..... 173
Sixth question..... 173
Seventh question..... 177
Teacher status..... 181
Teacher education..... 184
Sex..... 187
Teaching certificate..... 191
Type of school (grade level)..... 193
Eighth question.....
Summary.....

5. Conclusions and implications..... 202

Objectives of the study..... 202
Objective 1-Instrument construction..... 202
Objective 2- Content and face validity..... 204
Objective 3- Construct validity..... 204
Objective 4- Concurrent validity (Group differences)..... 206
Discussion of research questions..... 216
Recommendations..... 217
Summary..... 221

References..... 223

Appendices:

A. The instrument as used in the study..... 229
B. The formulated definition of inquiry..... 239
C. The instrument for undergraduate subjects..... 241
D. Pilot Study..... 250

E. Means of responses of groups of populations to items that measure teacher beliefs about inquiry teaching and learning and teacher learning experience represented by their components..... 297
