

Contents

1 Preliminaries

1.1 <i>Introduction</i>	1
1.2 <i>Basic Definitions of Chaos</i>	2

2 Definitions of Chaos

2.1 <i>Devaney's Definition of Chaos</i>	7
2.2 <i>Periodic Orbits and Turbulence</i>	20
2.3 <i>Lyapunov Chaos</i>	35
2.4 <i>Robinson's Chaos</i>	36
2.5 <i>Wiggins' Chaos</i>	37
2.6 <i>Touhey Chaos</i>	39
2.7 <i>Experimentalists' Chaos</i>	40
2.8 <i>Knudsen's Chaos</i>	42
2.9 <i>P-Chaos</i>	42
2.10 <i>Martelli's Chaos</i>	47
2.11 <i>Block-Coppel's Chaos</i>	50
2.12 <i>Li-Yorke Chaos</i>	52
2.13 <i>Topological Entropy</i>	61
2.14 <i>Auslander and Yorke's Chaos</i>	79
2.15 <i>Distributional Chaos</i>	80
2.16 <i>Kato's Chaos</i>	82
2.17 ω -Chaos.....	83

3 Related Definitions of Chaos and Cross-links

3.1 <i>Transitivity, Total Transitivity and Mixing</i>	89
3.2 <i>Transitivity and Density of Periodic Points</i>	100
3.3 <i>Uniform Sensitivity and Transitivity</i>	101
3.4 <i>Uniform Sensitivity and Pointwise Sensitivity</i>	104
3.5 <i>Extreeme Sensitivity and Uniform Sensitivity</i>	107
3.6 <i>Specification and Mixing</i>	111
3.7 <i>Blending and Transitivity</i>	116
3.8 <i>Lyapunove Exponent and Sensitivity</i>	119
3.9 <i>Expansivity and Sensitivity</i>	127
3.10 <i>Shared Periodic Orbit and Transitivity</i>	127
3.11 <i>Mixing and Sensitivity</i>	129
3.12 <i>Summary</i>	131

4 Relationships Between Definitions of Chaos when $X = I$

4.1 <i>Devaney versus Block-Coppel</i>	133
4.2 <i>Entropy versus Li-Yorke</i>	139
4.3 <i>Block-Coppel versus t-chaos</i>	143
4.4 <i>Knudsen, Robinson, Wiggins versus Devaney</i>	145
4.5 <i>Touhey versus Devaney</i>	146
4.6 <i>t-chaos versus Entropy</i>	149
4.7 <i>P-chaos versus DC-chaos, Devaney and Entropy</i>	150
4.8 <i>Martelli versus Devaney</i>	153
4.9 <i>Experimentalists' Chaos versus Devaney</i>	153
4.10 <i>Lyapunove versus Devaney</i>	153
4.11 <i>ω-chaos and DC-chaos versus Entropy</i>	153
4.12 <i>Li-Yorke and Devaney</i>	159
4.13 <i>Summary</i>	161

5 The Relations of the Definitions in General Case	168
6 Conclusion	173
7 References	175
