|----------|-----------------------------------------------------------------------------------|-----------|
| <b>1</b> | <b>Basic notation</b>                                                             | <b>10</b> |
| 1.1      | Preliminaries . . . . .                                                           | 10        |
| 1.2      | Injectivity and noetherian modules . . . . .                                      | 14        |
| 1.3      | Projectivity and artinian modules . . . . .                                       | 17        |
| <b>2</b> | <b>Weakly injective modules</b>                                                   | <b>21</b> |
| 2.1      | Basic results . . . . .                                                           | 21        |
| 2.2      | Direct sums of weakly injective modules . . . . .                                 | 27        |
| <b>3</b> | <b>Weakly projective modules</b>                                                  | <b>33</b> |
| 3.1      | Weakly projective modules . . . . .                                               | 33        |
| 3.2      | When weakly injective modules are weakly projective . . . . .                     | 40        |
| 3.3      | When weakly projective modules are weakly injective . . . . .                     | 42        |
| <b>4</b> | <b>Extending and Lifting modules</b>                                              | <b>46</b> |
| 4.1      | Extending modules . . . . .                                                       | 46        |
| 4.2      | Lifting modules . . . . .                                                         | 51        |
| 4.3      | Some conditions for a direct sum of extending module to be<br>extending . . . . . | 54        |
| <b>5</b> | <b>Weakly injective modules versus extending modules</b>                          | <b>57</b> |
| 5.1      | Weakly injective modules versus extending modules . . . . .                       | 57        |
| 5.2      | Weakly injective extending module . . . . .                                       | 60        |
