0.1	Notations . . . . .	v
	<b>Introduction</b>	<b>1</b>
<b>1</b>	<b>Basic Concepts</b>	<b>3</b>
1.1	Groups . . . . .	3
1.2	Rings . . . . .	4
1.2.1	Ring Homomorphisms . . . . .	4
1.2.2	Some Definitions . . . . .	5
1.3	Fields . . . . .	7
1.4	Some Number Theory . . . . .	7
1.4.1	Some preliminaries . . . . .	7
1.4.2	Congruences . . . . .	8
1.5	Special Rings . . . . .	13
1.5.1	The Ring Of Gaussian Integers $\mathbb{Z}[i]$ . . . . .	13
1.5.2	The Ring of Eisenstein Integers $\mathbb{Z}[\rho]$ . . . . .	20
1.5.3	Rings Of Algebraic Numbers . . . . .	26
<b>2</b>	<b>Main Results</b>	<b>29</b>
2.1	Rings of integers . . . . .	29
2.2	Rings of Gaussian integers . . . . .	51
2.3	Rings of Eisenstein integers . . . . .	67
2.4	Certain rings of algebraic numbers . . . . .	81

<b>3</b>	<b>Conclusions and Future Work</b>	<b>119</b>
3.1	Conclusions . . . . .	119
3.2	Future Work . . . . .	120
