

Contents

1	Introduction	5
I	Theory of Difference Equations	7
2	Dynamics of First Order Difference Equations	8
2.1	Introduction	8
2.2	The Equilibrium Points	9
2.2.1	The Cobweb Diagram	12
2.3	Periodic Points	13
3	Difference Equations of Higher Order	16
3.1	Theory of Linear Difference Equations	16
3.1.1	Linear Homogeneous Equations with Constant Coefficients	18
3.1.2	The Limiting Behavior of Solutions	19
3.2	Higher-Order Scalar Difference Equations	24
3.2.1	Asymptotic Stability Theorems of Linear Scalar Equations	24
3.2.2	Linearization of Nonlinear Equations	25
3.2.3	The Global Stability Theorems of Nonlinear Equations	27
II	A Study of Some Nonlinear Difference Equations	30
4	Dynamics of a Rational Difference Equation $x_{n+1} = \frac{\alpha + \beta x_n + \gamma x_{n-k}}{Bx_n + Cx_{n-k}}$	31
4.1	Introduction	31

4.2	The Equilibrium Points	35
4.3	The Local Stability	37
4.4	Analysis of Semi-Cycles	39
4.5	The Global Stability	49
4.6	Numerical Discussion	51
5	Global Asymptotic Stability of the Higher Order Equation	
	$x_{n+1} = \frac{ax_n + bx_{n-k}}{A + Bx_{n-k}}$	56
5.1	Introduction	56
5.2	The Equilibrium Points	59
5.3	The Local Stability of the Equilibrium Points	
	61	
5.3.1	The Local Stability of the Zero Equilibrium Point . . .	61
5.3.2	The Local Stability of the Positive Equilibria	63
5.4	The periodic Two Solution	65
5.5	The Global Stability	66
5.5.1	The Global Stability of the Zero Equilibria	66
5.5.2	The Global Stability of the Positive Equilibria	67
5.6	Numerical Discussion	69
6	On the Dynamics of the Rational Difference Equation $x_n =$	
	$\frac{A}{x_{n-k}} + \frac{B}{x_{n-3k}}$	72
6.1	Introduction	72
6.2	The Local Stability of the Equilibrium Point	75
6.3	Analysis Of The Global Stability, And The Semi-Cycles Of Solutions	79
6.4	The Periodic Behavior of The Solution	86
6.5	Numerical Discussion	90

III The MATLAB 6.5 Codes 94
