0.1	Definitions	3
0.2	Theory	5
0.3	Chebyshev Polynomials of the first kind	7
0.4	Legendre Polynomials	8
0.5	A priori estimates of the Schauder Type	10
0.6	Notations	11
1	Inverse Problems	13
1.1	Inverse problem of gravimetry	13
1.2	Inverse scattering	14
1.3	The inverse conductivity problem	15
1.4	Tomography (Integral geometry)	16
1.5	Inverse spectral problems	17
2	Inverse parabolic problems	19
2.1	Final overdetermination	21
2.2	Lateral overdetermination:single measurements	27
2.3	Lateral overdetermination:many measurements	28
2.4	Interior sources	31
3	Solution Strategies	35
3.1	Numerical solution for the inverse heat problem in \mathbb{R}	35
3.2	Solving the one dimensional inverse parabolic problem using Chebyshev polynomials of the first kind	37
3.3	Numerical solution of an inverse diffusion problem based on the Laplace transform and the finite difference method	41
3.4	A tau method for solving the one-dimensional parabolic in- verse problem based on the shifted Legendre polynomials	43

3.5	A high-order compact finite difference method for solving an inverse problem of the one-dimensional parabolic equation . . .	45
4	Inverse parabolic problems with discontinuous principal coefficient	51
4.1	Discontinuous principal coefficient	51
4.2	Regularization	68
4.3	Numerical solution for an inverse diffusion problem	69
4.4	Regularization by the Laplacian operator	76
5	Solving inverse parabolic problems using Adomian decomposition method	78
5.1	Adomian decomposition method	78
5.1.1	A general description of the ADM	79
5.1.2	Applications	80
5.2	Solution of some parabolic inverse problems by ADM	82
5.2.1	Parabolic inverse problems with unknown boundary conditions	82
5.2.2	Inverse parabolic problem with unknown control function	85
	References	87
