1	Solution of Difference Equations	3
1.1	Introduction to Difference Equation	3
1.2	Solution of First Order Linear Difference Equations	4
1.3	Theory of Linear Difference Equations	6
1.4	Solution of Linear Homogeneous Equations	8
1.5	Solution of Nonhomogeneous Linear Equations	10
1.6	Solution of Nonlinear Difference Equations	12
2	Behavior of Solutions for Difference Equations	16
2.1	The Equilibrium Points	16
2.2	Stability Theory	18
2.3	Criterion For The Asymptotic Stability	19
2.4	Periodic Points and Cycles	22
2.5	The Stair Step Diagrams	24
2.6	The Limiting Behavior Of The Solutions	25
3	Dynamics of $x_{n+1} = \frac{\alpha + \beta x_n + \gamma x_{n-k}}{A + Bx_n + Cx_{n-k}}$	29
3.1	Introduction and Preliminaries	29
3.2	Local Stability	33
3.3	Analysis Of Semi-Cycles	47
3.4	Global Stability	62
4	The Special cases $\alpha\beta\gamma ABC = 0$	69
4.1	One Parameter =0	69
4.1.1	The Case $C = 0 : x_{n+1} = \frac{\alpha + \beta x_n + \gamma x_{n-k}}{A + Bx_n}$	70
4.1.2	The Case $B = 0 : x_{n+1} = \frac{\alpha + \beta x_n + \gamma x_{n-k}}{A + Cx_{n-k}}$	70
4.1.3	The case $\beta = 0 : x_{n+1} = \frac{\alpha + \gamma x_{n-k}}{A + Bx_n + Cx_{n-k}}$	73
4.1.4	The case $\alpha = 0 : x_{n+1} = \frac{\beta x_n + \gamma x_{n-k}}{A + Bx_n + Cx_{n-k}}$	76
4.2	Two Parameters are zero	79
4.2.1	The Case $\alpha = \beta = 0 : x_{n+1} = \frac{\gamma x_{n-k}}{A + Bx_n + Cx_{n-k}}$	80
4.2.2	The Case $\alpha = \gamma = 0 : x_{n+1} = \frac{\beta x_n}{A + Bx_n + Cx_{n-k}}$	83
4.2.3	The Case $\beta = \gamma = 0 : x_{n+1} = \frac{\alpha}{A + Bx_n + Cx_{n-k}}$	85

4.2.4	The Case $A=C=0$: $x_{n+1} = \frac{\alpha+\beta x_n+\gamma x_{n-k}}{Bx_n}$	87
4.2.5	The Case $B=A=0$: $x_{n+1} = \frac{\alpha+\beta x_n+\gamma x_{n-k}}{Cx_{n-k}}$	88
4.2.6	The Case $\alpha=C=0$: $x_{n+1} = \frac{\beta x_n+\gamma x_{n-k}}{A+Bx_n}$	89
4.2.7	The Case $\beta=A=0$: $x_{n+1} = \frac{\alpha+\gamma x_{n-k}}{Bx_n+Cx_{n-k}}$	90
4.2.8	The Case $\beta=B=0$: $x_{n+1} = \frac{\alpha+\gamma x_{n-k}}{A+Cx_{n-k}}$	90
4.2.9	The Case $\beta=C=0$: $x_{n+1} = \frac{\alpha+\gamma x_{n-k}}{A+Bx_n}$	92
4.2.10	The Case $\gamma=A=0$: $x_{n+1} = \frac{\alpha+\beta x_n}{Bx_n+Cx_{n-k}}$	93
4.2.11	The Case $\gamma=B=0$: $x_{n+1} = \frac{\alpha+\beta x_n}{A+Cx_{n-k}}$	94
4.3	Three Parameters are zero	95
4.3.1	The Case $\gamma=A=B=0$: $x_{n+1} = \frac{\alpha+\beta x_n}{Cx_{n-k}}$	96
4.3.2	The Case $\alpha=A=C=0$: $x_{n+1} = \frac{\beta x_n+\gamma x_{n-k}}{Bx_n}$	97
4.3.3	The Case $\alpha=A=B=0$: $x_{n+1} = \frac{\beta x_n+\gamma x_{n-k}}{Cx_{n-k}}$	97
4.3.4	The Case $\beta=A=C=0$: $x_{n+1} = \frac{\alpha+\gamma x_{n-k}}{Bx_n}$	98
4.3.5	The Case $\beta=A=B=0$: $x_{n+1} = \frac{\alpha+\gamma x_{n-k}}{Cx_{n-k}}$	98
4.3.6	The Case $\beta=\gamma=A=0$: $x_{n+1} = \frac{\alpha}{Bx_n+Cx_{n-k}}$	99
4.3.7	The Case $\beta=\gamma=C=0$: $x_{n+1} = \frac{\alpha}{A+Bx_n}$	100
4.3.8	The Case $\beta=\gamma=B=0$: $x_{n+1} = \frac{\alpha}{A+Cx_{n-k}}$	100
4.3.9	The Case $\alpha=\gamma=C=0$: $x_{n+1} = \frac{\beta x_n}{A+Bx_n}$	102
4.3.10	The Case $\alpha=\gamma=B=0$: $x_{n+1} = \frac{\beta x_n}{A+Cx_{n-k}}$	102
4.3.11	The Case $\alpha=\gamma=A=0$: $x_{n+1} = \frac{\beta x_n}{Bx_n+Cx_{n-k}}$	105
4.3.12	The Case $\alpha=\beta=A=0$: $x_{n+1} = \frac{\gamma x_{n-k}}{Bx_n+Cx_{n-k}}$	105
4.3.13	The Case $\alpha=\beta=C=0$: $x_{n+1} = \frac{\gamma x_{n-k}}{A+Bx_n}$	106
4.3.14	The Case $\alpha=\beta=B=0$: $x_{n+1} = \frac{\gamma x_{n-k}}{A+Cx_{n-k}}$	107
4.4	Four Parameters are zero	110
4.4.1	The case $\alpha=\gamma=A=B=0$: $x_{n+1} = \frac{\beta x_n}{Cx_{n-k}}$	111
4.4.2	The case $\alpha=\beta=C=A=0$: $x_{n+1} = \frac{\gamma x_{n-k}}{Bx_n}$	111
4.5	Numerical Analysis	114
