Abstract II

Acknowledgments IV

List of Figures IX

List of Tables XI

1 **Introduction** 1

2 **Overview of the Used Computational Methods** **6**

2.1 Introduction 6

2.2 Quantum Mechanics 7

2.2.1 Schrödinger Equation 7

2.2.2 Schrödinger Equation for the Hydrogen Atom 8

2.2.3 The Schrödinger Equation for the Helium Atom Can not Be Solved Exactly 9

2.2.4 Perturbation Theory 11

2.2.5 Variation Method 12

2.2.6 Multi-Electron System 17

2.3 Basis Sets 19

2.3.1 Double Zeta Basis Sets 23

2.3.2 Split Valence Basis Sets 24

2.3.3 Triple Zeta Basis Sets 25

2.3.4 Notations 25

2.3.5 Polarized Basis Sets 28

2.3.6 Diffuse Functions 28

2.3.7 Basis Set Effects 29

2.4 Electronic Structure Calculations 29

2.4.1 Semi-Empirical Methods 30

2.4.2 Ab-initio Methods 30

2.4.3 The Hartree-Fock Approximation 30

2.4.4 The Limits of Hartree-Fock Method 33

2.4.5 The Density Functional Theory 34

3 Software Packages and Computational Methodology 40

3.1 Gaussian 98 Software 40

3.1.1 Running Gaussian 98 40

3.1.2 Using Gaussian Checkpoint 41

3.1.3 Checkpoint File Utilities 46

3.2 Chem3D 46

3.2.1 Viewing Gaussian Structures with Chem3D 47

3.3 Computational Details 48

3.4 Procedure 50

3.4.1 Single Point Calculations 50

3.4.2 Geometry Optimization 50

3.4.3 Optimization Algorithm 52

3.4.4 Frequency Calculations 53

4 Reactivity and Bonding of Metal Carbonyl Complexes 55

4.1 Introduction 55

4.2 Carbonyl Complexes 56

4.3 Phosphine Ligands 58

4.4 Trans-Effect (TE) 61

4.4.1 Introduction 61

4.4.2 Background 57

4.4.3 Structural Trans-effect (STE) In Octahedral Metal Complexes 63

4.4.5 Kinetic Trans-effect (KTE) in Octahedral Metal Complexes 63

5 Results and Discussion 65

5.1 Structure and Energy of $Cr(CO)_6$ 65

5.2 Predicted Geometry of $Cr(CO)_5pip$ 68

5.3 Vibrational Frequencies for $Cr(CO)_5pip$ 69

5.4 Structure and Properties of (η^1-chlorobenzene)$Cr(CO)_5$ 72

5.4.1 Carbonyl Frequencies of (η^1-chlorobenzene)$Cr(CO)_5$ 74

5.5 Structure and Properties of Trans-(CB)(L)$Cr(CO)_4$ Complexes, where L = CO, PH_3, PCl_3 and PF_3 78

5.6 Predicted Energy of trans-(CB)(L)$Cr(CO)_4$ Complexes, where L = CO, PH_3, PCl_3 and PF_3 82

5.7 Predicted Vibrational Frequencies of trans-(CB)(L)$Cr(CO)_4$ Complexes, where L = CO, PH_3, PCl_3 and PF_3 83

5.8 Potential Energy Surface Scans 86

5.8.1 Potential Energy Surface Scans of trans-(CB)(PCl_3)$Cr(CO)_4$ 87

5.9 The Binding Energy 88

5.9.1 Overall Stability 89

6 Conclusion **91**
