# Table of Contents

**1. Introduction**

1.1 *Historical background*  
1.2 *Classifications of Herpesviruses*  
1.2.1 *Alphaherpesvirinae*  
1.2.1.1 *Genus Simplexvirus*  
1.2.1.2 *Genus Varicellovirus*  
1.2.2 *Betaherpesvirinae*  
1.2.3 *Gammaherpesvirinae*  
1.2.3.1 *Genus Lymphocryptovirus*  
1.2.3.2 *Genus Rhadinovirus*  
1.3 *Human cytomegalovirus*  
1.3.1 *Structure of human cytomegalovirus*  
1.3.2 *Glycoproteins*  
1.3.2.1 *Major glycoprotein (gB; pUL55)*  
1.3.2.2 *Glycoprotein H (gH, pUL75)*  
1.3.2.3 *Glycoprotein L (gL, UL115)*  
1.3.3 *UL16 glycoprotein*  
1.3.3.1 *Tegument proteins*  
1.3.3.1.1 *pp65*  
1.3.3.2 *UL97 kinase*  
1.3.3.3 *pp28 (ppUL99)*  
1.3.3.4 *pp150 (ppUL32)*  
1.3.4 *Capsid*  
1.4 *Life cycle of HCMV*  
1.5 *HCMV egress and assembly*  
1.6 *Interaction of cellular kinases with HCMV*  
1.6.1 *Serine threonine kinases*  
1.6.1.1 *Staurosporine*  
1.7 *Epidemiology of Human CMV*
Infection

1.8 Diseases caused by HCMV 23
1.8.1 Cytomegalic inclusion disease (CID) 24
1.8.2 Asymptomatic congenital human cytomegalovirus 24
1.8.3 Perinatal infection 25
1.8.4 Human cytomegalovirus mononucleosis 25
1.8.5 Transfusion-acquired human cytomegalovirus infection 26
1.8.6 Human cytomegalovirus infections in immunocompromised patients 26
1.8.7 Other diseases caused by HCMV 26
1.9 HCMV antiviral drugs 27
1.10 Research significance 29
1.11 Objectives 30

2. Materials and Methods 31

2.1 Cell culture 31
2.1.1 Cell lines and media 31
2.1.2 Propagation and Passage of HFF Cell 32
2.1.3 Freezing and Thawing of HFF Cell 32
2.2 Viruses 33
2.2.1 Propagation of Viruses 34
2.2.2 Viral Titration and Plaque Assay 35
2.2.3 Viral infection assay 36
2.3 Immunofluorescence (IF) 38
2.4 Monoclonal, polyclonal antibodies and fluorescing markers 39
2.5 Fluorescence Image capturing 40
2.6 Cell lysis for protein extraction 41
2.7 Western Blot analysis (WB) 42
2.7.1 Preparation of the polyacrylamide 42
