Table of Contents

CHAPTER ONE
INTRODUCTION
1.1 Palestinian Society: Background and Demographic trends
  1.1.1 Historical Background
  1.1.2 Demographic trends
  1.1.3 Households
  1.1.4 Education
  1.1.5 Marriage and reproductive health
1.2 An overview of the Health Care System in Palestine:
1.3 Significance of the study
1.4 Purpose and objectives of the study
1.5 The research questions

CHAPTER TWO
LITERATURE REVIEW
Introduction
  2.1 Adolescence: a general framework
    2.1.1 Adolescents: Demographic indicators and characteristics
    2.1.2 The theoretical frameworks
    2.1.3 Adolescence: a developmental approach
    2.1.4 Broad interpretation of health
    2.1.5 Adolescents' health studies
  2.2 The Role of Models and Theories in Health Education
  2.3 The Role of the Health Educator
  2.4 The Stimulus-Organism-Response Model

CHAPTER THREE
METHODOLOGY
Introduction:
  3.1 Nursing research methods
    3.1.1 Types of Qualitative Research Method
    3.1.2 Types of Quantitative Research
    3.1.3 Triangulation:
  3.2 The Study Research Design
  3.3 Setting and sampling plan
  3.4 Instrumentation and questionnaire development
    3.4.1 The Instrument Construction
  3.5 Gaining Access and Ethical Consideration
  3.6 Data collection procedures
    3.6.1 The pre-intervention data collection
    3.6.2 The post-intervention data collection
  3.7 Data analysis procedures
    3.7.1 The pre-intervention (pre-test) data analysis
    3.7.2 The post intervention (post test) data analysis
    3.7.3. Sample and Response at post test
  3.8 Expected outcomes
CHAPTER FOUR
PRE-INTERVENTION DATA ANALYSIS AND FINDINGS

Introduction

4.1 The pre-intervention data analysis

4.2 Analysis of category III (female adolescents’ health beliefs and attitudes toward psychological/emotional development)

4.3 Analysis of Category IVA and 1VB (beliefs and attitudes of female adolescents toward social development)

4.4 Analysis of subjective questions in category V of the questionnaire

4.5 Conclusion of the pre-intervention results

CHAPTER FIVE
THE HEALTH EDUCATION INTERVENTION PROGRAMME

5.1 Rational for intervention

5.2 The Process of Health Education

5.3. The Implementation tactics

5.4 The educational sessions

5.5 Evaluation for intervention

CHAPTER SIX
POST-INTERVENTION DATA ANALYSIS

6.1 Statistical analysis and results

6.2 A comparison of the participants’ socio-demographic variables at pre-test and post-test

6.3 Analysis of the psychological and social variables

6.4 Comparisons of the psychological and social health Beliefs and attitudes at pre-test

6.5 Comparisons of the psychological and social health beliefs and attitudes at post-test

CHAPTER SEVEN
DISCUSSION

7.1 Revisiting the purpose and objectives of the study

7.2 Methodological consideration

7.3 The Instrument employed for the post intervention data collection

7.4 Adequacy of the sample size

7.5 Statistical analysis and the use of t tests

7.6 Limitation of the study

7.7 The social and demographic characteristics of the respondents and their families

7.8 The health educator role and the intervention approaches

7.9 The effectiveness of intervention and pre-test on the adolescents’ psychological and social health beliefs and attitudes.

CHAPTER EIGHT
IMPLICATIONS AND CONCLUSIONS

8.1 Contribution of the study to the body of knowledge

8.2 Implication of the research globally

8.3 Implication to primary health care in Palestine

8.4 Recommendations

BIBLIOGRAPHY
