List of Figures	iv
List of Tables	vi
1 Introduction	1
1.1 Motivation	1
1.2 Scope of the Research	2
2 Electrocardiogram and Heart Arrhythmias	5
2.1 Rhythmic Operation of the Heart	5
2.2 The Electrocardiogram ECG	6
2.2.1 The Electrocardiogram Deflections	7
2.2.2 Definitions of Timing Intervals of the ECG	9
2.3 Heart Rhythms	10
2.3.1 Normal Sinus Rhythm	10
2.3.2 Sinus Arrhythmia	11
2.3.3 Sinus Tachycardia	11
2.3.4 Sinus Bradycardia	11
2.3.5 Atrial Premature Complexes (APC)	11
2.3.6 Atrial Tachycardia	11
2.3.7 Junctional Tachycardia	12
2.3.8 Premature Ventricular Complexes (PVC)	12
2.3.9 Ventricular Tachycardia	12
2.3.10 Junctional Escape Beat	13
2.3.11 Sinus Escape Beat	13
2.3.12 Ventricular Escape Beat	13
3 Survey of ECG Processing Techniques	14
3.1 Noise Sources	14
3.1.1 Power Line Interference	14
3.1.2 Electrode Contact Noise	15
3.1.3 Motion Artifacts	15

3.1.4	Muscle Contractions (EMG)	16
3.1.5	Baseline Drift and ECG Amplitude Modulation with Respiration	16
3.1.6	Noise Generated by Electronic Devices Used in Signal Processing	17
3.1.7	Electrosurgical Noise	17
3.2	Algorithms Based on Amplitude and First Derivative	18
3.3	Algorithms Based on First Derivative Only	19
3.4	Algorithms Based on First and Second Derivative	19
3.5	Algorithms Based on Digital Filters	20
4	Wavelet Transform	22
4.1	Wavelet Historical Overview	22
4.2	From Fourier Transforms to Wavelet Transforms	23
4.3	Continuous Wavelet Transform	24
4.4	Discrete Wavelet Transform	27
4.5	Some wavelet Transform Properties	28
4.6	Wavelet De-Noising	29
4.6.1	Basic Concept of De-Noising Method	30
4.6.2	Threshold Types	31
4.6.3	Threshold Methods	32
5	ECG Characteristic point Detection	36
5.1	Introduction	36
5.2	Detection Algorithm	38
5.2.1	QRS complex Detection	41
5.2.2	Onset, Offset and width of QRS Complex	43
5.2.3	T and P Wave Detection	46
5.2.4	Corrected QT Interval QTc	47
5.3	Preprocessing Techniques	48
6	Fuzzy Logic and Arrhythmia Detection	51
6.1	Fuzzy Logic versus Conventional Logic	51
6.2	Fuzzy Expert System FES	52
6.3	Medical Fuzzy Expert System	54
7	Design Methodology and System Evaluation	61
7.1	System Architecture	61
7.2	LabVIEW	63
7.2.1	LabVIEW Features	63
7.2.2	Why Choosing LabVIEW	64
7.3	System Evaluation	64
8	Conclusion	75
A	ECG Amplifier Design	77
B	MIT/BIH Database	82
