

Table of Contents

Abstract	i
Acknowledgment	iii
List of Tables	vi
List of Figures	vii
List of Abbreviations and Symbols	viii
Chapter 1: Introduction	1
1.1 Background.	1
1.2 Research problem	4
1.3 Study hypothesis	4
1.4 Aim and Objectives	4
1.5 Approach and Methodology	5
1.6 Thesis outline	5
Chapter 2: Literature Review	6
2.1 Global climate change trends	6
2.2 Mediterranean and Palestinian climate change trends	7
2.3 Observed temperature trends over the Mediterranean	8
2.4 Observed precipitation trends over the Mediterranean	8
2.5 Impacts of climate change on agriculture	8
2.5.1 Biophysical impacts	9
2.5.2 Socioeconomic impacts	10
2.6 Climate change scenarios	12
2.6.1 Synthetic scenarios	13
2.6.2 GCM scenarios	13
2.7 The Palestinian climate change scenarios	13
2.8 The Israeli climate change scenarios	14
2.8.1 Climate changes	14
2.8.2 An integrated scenario for climate change in Israel	15
2.9 Environmental impacts	16
2.9.1 Hydrology	16
2.9.2 Agriculture	16
2.10 Future climate change in Israel	16
2.11 Observed climate change in the region and in Israel	18
2.11.1 Regional warming	18
2.11.2 Cooling trend	18
2.11.3 Precipitation	19
2.12 Adaptation	22
2.12.1 Adaptation options	22
2.12.2 Parries to adaptations	23
2.12.3 Principle of good adaptation	24
2.13 Mitigation	25
2.14 Previous studies	26

Chapter 3: Description of the study area	38
3.1 Location and population	38
3.2 Topography	39
3.3 Meteorology	40
3.4 Soil	43
3.4.1 Characteristics of major soil types	44
3.4.2 Soil degradation	45
3.5 Agriculture in Jenin area	46
3.6 Water resources in Jenin district	47
Chapter 4: Methodology	49
4.1 General	49
4.2 Data collection	49
4.3 Study scenarios	50
4.4 Rainfall data analysis (seasonal shift)	50
4.5 CROPWAT computer model	50
4.5.1 Calculating irrigation requirements (IR)	51
4.5.2 Data required for CROPWAT	51
4.5.3 Crop data	52
4.6 Calculating yield reduction	53
4.7 Economics (sample calculation)	53
Chapter 5: Results and Discussion	55
5.1 General	55
5.2 Impact of climate change	55
5.2.1 Impact of increasing temperature and decreasing precipitation on yield reduction	55
5.2.2 Impact of increasing temperature and decreasing precipitation on irrigation requirements (IR)	59
5.3 Impacts on the seasonal shift	61
5.4 The economical loss according to changes in precipitation and temperature	63
5.5 Commentary on previous studies	64
Chapter 6: Conclusion and Recommendation	67
6.1 Conclusion	67
6.2 Recommendation	68
References	69
Annexes	80
