List of abbreviations	XVII
1 Introduction	1
1.1 Background	1
1.2 Objectives	3
1.3 Contents of the Thesis Report	4
2 Literature Review	5
2.1 General	5
2.2 Algae and duckweed based waste stabilization ponds	5
2.2.1 Algae based ponds	5
2.2.2 Duckweed based ponds	6
2.2.2.1 Advantages and limitations of DBPs systems	7
2.2.2.2 Wastewater treatment by DBPs	7
2.3 Anaerobic Pretreatment	7
2.3.1 UASB technology	8
2.3.2 UASB-septic tank	9
2.3.2 Effect of anaerobic pretreatment on ponds performance	10
2.4 Effect of depth on pond performance	11
2.4.1 Effect of depth on environmental conditions	11

2.4.2	Effect of depth on removal of pollutants	12
2.4.2.1	Effect of depth on nitrogen removal	12
2.4.2.2	Effect of depth on total phosphorus removal	13
2.4.2.3	Effect of depth on COD removal	14
2.4.2.4	Effect of depth on heavy metals removal	14
2.5	Capacity of ABPs and DBPs in nitrogen removal	15
2.6	Main nitrogen removal pathways in ABPs and DBPs	16
2.6.1	Nitrogen removal pathways	16
2.6.2	Nitrogen removal mechanisms	17
2.6.2.1	Nitrification and denitrification in ABPs and DBPs	17
2.6.2.2	Ammonia volatilization in ABPs and DBPs	17
2.6.2.3	Nitrogen incorporation into biomass	19
2.6.2.4	Nitrogen fixation	19
2.7	ABPs and DBPs removal capacity for other parameters	20
2.7.1	(Bio) chemical oxygen demand removal	20
2.7.2	Total suspended solids (TSS) removal	20
2.7.3	Pathogen removal	21
2.7.4	Heavy Metals Removal	22
2.8	Design considerations	22
2.8.1	Hydraulic Retention Time	23
2.8.2	Organic Loading Rate	24
2.8.3	Land Requirement	24
2.9	Contribution of microorganisms in treatment	25
2.10	Duckweed growth conditions	25
2.10.1	External Factors affecting growth of duckweed	26
2.10.1.1	Temperature	26
2.10.1.2	Light intensity	26
2.10.1.3	Wind diffusion	27
2.10.1.4	Algal activity and toxins	27
2.10.2	Wastewater Characteristics	27
2.10.2.1	Nutrients concentration	27
2.10.2.2	pH value	28

	2.10.2.3	Ammonium and ammonia concentration	28
	2.10.2.4	COD concentration	29
	2.10.2.5	DO concentration	29
	2.10.2.6	Heavy metals concentration	29
2.11		Harvesting of Duckweed	29
2.12		Mosquitoes and odor control	30
3		Materials and Methods	32
3.1		Experimental setup	32
3.2		Source of duckweed	32
3.3		Source of wastewater	33
3.4		System description	33
3.5		Main research periods	35
3.6		Design of stabilization ponds	36
3.7		Wastewater sampling	36
3.8		Wastewater Sampling Point	36
3.9		Wastewater analysis	37
	3.9.1	Chemical analysis	37
		3.9.1.1 COD	37
		3.9.1.2 TKN	37
		3.9.1.3 NH_4^+	38
		3.9.1.4 TP	38
	3.9.2	Physical analysis	38
		3.9.2.1 TSS	38
		3.9.2.2 TS	38
		3.9.2.3 pH	38
		3.9.2.4 Temperature	39
		3.9.2.5 Color	39
		3.9.2.6 DO	39
	3.9.3	Sediment collection	39
3.10		Calculations	39
3.11		Data Analysis	42
4		Results and Discussion	44

4.1	General	44
4.2	Physicochemical Properties of the System	44
	4.2.1 Temperature	44
	4.2.2 Dissolved oxygen (DO)	46
	4.2.3 pH	47
4.3	Removal efficiencies of pollutant forms	49
	4.3.1 Removal efficiency of solids	49
	4.3.1.1 Removal efficiency of TSS	49
	4.3.1.2 TDS removal efficiency	53
	4.3.1.3 TS removal efficiency in ABPs	54
	4.3.2 COD removal efficiency in DBPs and ABPs	56
	4.3.2.1 COD removal in DBPs	56
	4.3.2.2 COD removal in ABPs	58
	4.3.2.3 Comparison and discussion	60
	4.3.3 Total phosphorus (TP) removal	62
	4.3.3.1 TP removal in DBPs	62
	4.3.3.2 TP removal in ABPs	64
	4.3.3.3 Comparison and discussion	65
	4.3.4 Ammonium (NH_4^+) removal	67
	4.3.4.1 NH_4^+ removal in DBPs	67
	4.3.4.2 NH_4^+ removal in ABPs	69
	4.3.4.3 Comparison between the two periods in NH_4^+ removal	70
	4.3.5 Total Kjeldahl nitrogen (TKN) removal	72
	4.3.5.1 TKN removal in DBPs	72
	4.3.5.2 TKN removal in ABPs	74
	4.3.5.3 Comparison between the two periods in TKN removal	75
4.4	Sedimentation	76
4.5	Nitrogen Mass Balance	78
4.6	Prediction for the unaccounted nitrogen removal mechanisms	79
	4.6.1 Ammonia volatilization	79
	4.6.2 Denitrification and other insignificant nitrogen pathways	81

4.7	Land requirement	83
4.8	UASB-septic tank followed by pond system	85
4.9	Investigation of the causes behind duckweed death	89
4.9.1	Controlling the environmental conditions related to algal growth in DBPs	89
4.9.2	Investigation the effect of wastewater culture on duckweed growth	90
4.9.2.1	Effect of wastewater strength on duckweed growth	91
4.9.2.2	First dilution test	91
4.9.2.3	Second dilution test	93
5	Conclusions and Recommendations	96
5.1	Conclusions	96
5.2	Recommendations	100
	References	101
	Appendices	110
	Arabic Abstract
