

## Table of content

|  |      |
|--|------|
| Acknowledgment .....   | I    |
| List of Tables .....   | V    |
| List of Figures .....  | VI   |
| Abstract .....   | VIII |
| Abbreviations .....  | XI   |
| Chapter One: Introduction .....  | 1    |
| 1.1 Background .....   | 1    |
| 1.2 Current gaps related to the study .....                              | 1    |
| 1.3 Objectives .....   | 3    |
| 1.4 Set up description .....   | 3    |
| 1.5 Structure of thesis .....  | 4    |
| Chapter Two: Litrature review .....                                      | 6    |
| 2.1 Background .....   | 6    |
| 2.2 Zeolite Structure .....  | 6    |
| 2.3 Type of Zeolite .....  | 9    |
| 2.3.1 Natural Zeolite .....  | 10   |
| 2.3.2 Synthetic Zeolite .....  | 11   |
| 2.4 Important physical and chemical properties of Zeolite .....          | 11   |
| 2.4.1 Adsorption .....   | 12   |
| 2.4.2 Ion exchange .....   | 15   |
| 2.4.3 Catalysis .....  | 16   |
| 2.5 Zeolite used for wastewater treatment .....                          | 17   |
| 2.5.1 Heavy metal removal.....   | 18   |
| 2.5.2 Zeolite used for nutrients removal .....                           | 19   |
| 2.5.3 Zeolite via activated carbon as wastewater treatment process ..... | 21   |
| 2.6 Zeolite used for soil amendment .....                                | 22   |
| Chapter Three: Methodology .....   | 27   |
| 3.1 Site preparation.....  | 27   |
| 3.1.1 Heavy metal removal .....  | 27   |
| 3.1.2 Zeolite used for nutrients removal .....                           | 27   |
| 3.1.3 Zeolite via activated carbon as wastewater treatment process ..... | 27   |
| 3.1.4 Works for agriculture docks .....                                  | 28   |
| 3.1.5 Zeolite via activated carbon as wastewater treatment process ..... | 30   |
| 3.2 Setup of reuse project.....  | 31   |
| 3.2.1 Major Features of Sorghum seedsused on the project .....           | 31   |
| 3.2.2 Fresh water and treated wastewater .....                           | 31   |
| 3.3 Experiment .....   | 33   |

|               |   |    |
|---------------|---|----|
| 3.3.1         | Site description .....                      | 32 |
| 3.3.2         | Treatments and experimental units .....     | 33 |
| 3.2.1         | Growth process and field measurements ..... | 34 |
| 3.4           | Harvesting .....                            | 35 |
| 3.5           | Laboratory analysis .....                   | 35 |
| Chapter Four: | Results and discussion .....                | 37 |
| 4.1           | Characteristica of irrigation water .....   | 37 |
| 4.1.1         | Tap water .....                             | 37 |
| 4.1.2         | Treated wastewater .....                    | 39 |
| 4.2           | Soil analysis .....                         | 40 |
| 4.2.1         | Soil texture analysis .....                 | 40 |
| 4.2.2         | Soil physical parameters.....               | 43 |
| 4.2.3         | Soil heavy metals .....                     | 48 |
| 4.2.2         | Soil nutrients .....                        | 52 |
| 4.3           | Plant analysis .....                        | 54 |
| 4.3.1         | Chemical analysis .....                     | 54 |
| 4.3.1         | Plant morthology.....                       | 59 |
| 4.4           | Pathogenic E.coli .....                     | 63 |
| Chapter Five: | Conclusions and recommendations .....       | 64 |
| 5.1           | Conclusions .....                           | 64 |
| 5.2           | Recommendations .....                       | 65 |
| References    | .....                                       | 66 |
| Appendices    | .....                                       | 70 |
