

# Table of Contents

1.	CHAPTER 1: INTRODUCTION	1
1.1	Background	1
1.1.1	Heavy metals in biosolids	2
1.1.2	Biosolids application- potential impact and limitations	4
1.1.3	Biosolids types for agricultural use	6
1.1.4	Recommended methods and rates of biosolids application	6
1.1.5	Planting, grazing and harvesting constraints	8
1.1.6	Environmental protection	8
1.2	Study Objectives and Significance	9
1.3	Study area	13
1.3.1	Al-Bireh wastewater treatment plant – treatment performance and operational status	13
1.3.2	Biosolids production and disposal	13
1.3.2.1	Biosolids production	13
1.3.2.2	Biosolids disposal	14
2	CHAPTER 2: LITERATURE REVIEW	16
2.1	Definition	16
2.2	Biosolids as a valuable source of nutrients	16
2.3	Potential negative impacts	17

2.4	Regulatory Overview	20
2.4.1	USA-EPA regulations	20
2.4.2	Israeli regulations	21
2.4.3	Directives of the European Economic Commission (No. 86/278/EEC)	21
2.4.4	Regulations and quality of Industrial wastewater discharge from Al Bireh industrial zone	22
2.5	Al-Bireh biosolids Composting and Reuse of Reclaimed Wastewater demonstration	24
3	CHAPTER 3: RESEARCH DESIGN AND APPLIED METHODOLOGIES	26
3.1	Introduction	26
3.2	Heavy metals determination and mass balance assessment for biosolids of AWWTP	27
3.2.1	Sampling procedure	28
3.2.1.1	Biosolids sampling	28
3.2.1.2	Wastewater sampling	30
3.2.2	Primary analysis and digestion of samples	30
3.2.2.1	Biosolids characterization	30
3.2.2.2	Biosolids samples digestion	35
3.2.3	Heavy metals determination by inductively coupled plasma spectrophotometer	37
3.2.4	Mass balance assessment	39
3.3	Assessment of biosolids application impact on growth and productivity of Egyptian clover ( <i>Trifolium alexandrium</i> )	40
3.3.1	Basic definitions	40
3.3.2	Applied methodology	41

3.3.2.1 Crop selection	41
3.3.2.2 Crop characteristics	41
3.3.2.3 Biosolids preparation	42
3.3.2.4 Experimental design	43
3.3.2.5 Biosolids application rates	44
3.4 Experiment observations	46
3.4.1 Heavy metals phytotoxicity	46
3.4.2 Impact of biosolids application on growth rate and biomass production	47
4 CHAPTER 4 - RESULTS AND DISCUSSION	49
4.1 Wastewater influent and effluent analysis	49
4.2 Heavy metals mass balance	54
4.3 Biosolids characterization and ICP-AES analysis	56
4.3.1 Basic biosolids characteristics	56
4.3.1.1 PH value	56
4.3.1.2 Salinity (EC value)	57
4.3.1.3 Total solids content (TS)	57
4.3.2 Heavy metals concentrations	57
4.4 Determination of biosolids quality compared to other biosolids standards	60
4.5 Heavy metals phytotoxicity observation	63
4.6 Visual assessment of plant growth	64

4.7	Observations of growth and biomass production	66
4.7.1	Plant growth indicators	66
4.7.2	Biomass production	73
5	CHAPTER 5:CONCLUSION AND RECOMMENDATIONS	78
5.1	Conclusion	78
5.2	Recommendations	78
	REFERENCES	80
	ANNEXIES	87
	Annex 1 Mass balance measurement sheets for heavy metals	88
	Annex 2 Recorded measurements of plant height and number of leaves at different intervals	91
	Annex 3 Palestinian Standards for effluent reuse	93
	Arabic Abstract	94
