

Table of Contents

Table of Contents.	ii
List of Tables.	iv
List of Abbreviations.	v
Abstract.	viii

Chapter 1

1 Introduction.	1
-------------------------	---

Chapter 2

2.1 Algorithms of Blind Equalization and identification.	6
2.2 Blind Identification and Equalization in communication channels.	7
2.3 Blind Single Input Single Output (SISO) equalization.	8
2.4 Channel Equalization in QAM Data Communication system	9
2.5 Popular Algorithms for blind equalizatio	12
2.5.1 Sato Algorithm	12
2.5.2 BUSSAGE Algorithm.	14
2.5.3 Stop-And-Go Algorithm.	14
2.5.4 Constant Modulus (Godard) Algorithms.	16
2.6 Convergence of Blind SCD equalizers.	20
2.7 Summary of Algorithms.	22

Chapter 3

3.1 Blind identification and equalization based on second order cyclostationary statistics	24
--	----

3.2 Cyclostationary Signal Properties.	28
3.3 Time Domain Representation of Cyclostationary.	29
3.4 Frequency Domain Approaches.	31
3.5 Cyclic Autocorrelation Function.	33
3.6 Cyclostationarity for Over Sampled Channel Output.	34

Chapter 4

4.1 Blind Identification of ARMA System based on Second Order Cyclic Statistics	37
4.2 Parametric ARMA Identification Method.	43
4.3 Identifying Poles and Zeros.	45
4.4 Algorithm.	49
4.5 Computer Simulation Results.	50
Conclusion	59
