ACKNOWLEDGEMENTS

ABSTRACT

CHAPTER ONE

INTRODUCTION

1.1 General Discussion	1
1.2 Project Objectives and Procedure	3

CHAPTER TWO

THE CONTINUOUS DISTILLATION UNIT

2.1 Introduction	5
2.2 The Conventional Distillation Unit	5
2.2.1 The Column	6
2.2.2 The Feed Section	6
2.2.3 The Reboiler Section	6
2.2.4 The Condenser Section	7
2.3 The Distillation Process	7
2.4 The Control Problems of a Distillation Unit	8
2.5 The Pilot Plant 8" Distillation Column	9

CHAPTER THREE

MODELLING OF THE EIGHT INCH DISTILLATION COLUMN

3.1 Introduction	11
3.2 Literature Review on Column Dynamics	12
3.3 Dynamics of the Installed 8" Distillation Column	17
3.3.1 Dynamics of the Distillation Column under Total Reflux	17
3.3.2 Dynamics of the Distillation Column, as Stripping and Rectifying Sections	26
3.4 The Auxiliary Equipment	29
3.4.1 Thermosyphon Reboiler	29
3.4.2 The Condenser Dynamics	35
3.4.3 Top Drum, Reflux Flow Dynamics	37

CHAPTER FOUR	<u>SIMULATION</u>	Page
4.1	Introduction	41
4.2	The Conversational Mode Simulation Package	41
4.3	Simulation Studies	42
4.3.1	Transient response of distillation column	43
4.3.2	Column response to doublet input on steam flow	44
4.3.3	Doublet variation on the reflux flow rate	45
4.3.4	Doublet variation on the cooling water line	45
4.3.5	Column response to step input on steam line	46
4.4	Further Simulation Studies	46
4.4.1	Partial liquid mixing in the reflux drum	47
4.4.2	Partial liquid mixing in the reflux drum and hydraulic lag	47
4.5	Simulation of the Stripping and Rectifying Operations	48

CHAPTER FIVE	<u>BASIC CONTROL SCHEMES</u>	
5.1	Introduction	49
5.2	Literature Review and Distillation Column Control	49
5.3	The Control Problem Presentation and Discussion	57
5.4	The Control Strategies	59

CHAPTER SIX	<u>CONTROLLER DESIGN</u>	
6.1	Introduction	63
6.2	Formulation of the Problem	63
6.3	The Development of the Controller Design	66
6.3.1	The multivariable theory "Nyquist Array Technique"	67
6.3.2	The Pole Assignment Technique	69
6.4	Application of Pole Assignment Design Technique	71
6.5	Controller Design for Stripping and Rectifying Column Operations	72

	Page
6.5.1 Top-to-bottom liquid flow (rectifying section)	72
6.5.2 Bottom-to-top liquid flow (stripping section)	73
6.6 Distillation Unit Response to Disturbances	74
6.6.1 Open Loop System	74
6.6.2 Closed Loop System	75
6.7 Further Investigations	75
6.7.1 Partial liquid mixing in the reflux drum, closed loop control	76
6.7.2 Partial liquid mixing in the reflux drum, controller design	76
6.7.3 The classical control from the view point of The Pole Assign- ment	77

CHAPTER SEVEN DISCUSSION, CONCLUSION, AND FURTHER WORK

7.1 Discussion	79
7.1.1 General	79
7.1.2 Modelling	79
7.1.3 Simulation	80
7.1.4 Control	81
7.2 Model Verification and Controller Application to the 8" Distillation Column	92
7.3 Conclusion	96
7.4 Further Work	96
7.4.1 The column dynamics	96
7.4.2 The Reboiler	97
7.4.3 Measuring devices + control valves	97
7.4.4 The control studies	98
7.4.5 Simulation studies	98
