

Table of contents

1	Chapter One.....	1
	Introduction.....	1
1.1	Background	1
1.2	Problem Description.....	2
1.3	Study Objectives	3
1.4	Scope of the Study.....	3
1.5	Project location.....	4
2	Chapter Two.....	5
	Literature review	5
2.1	Introduction	5
2.2	Poultry industry	6
2.2.1	Poultry industry in Palestine	6
2.2.2	Poultry industry worldwide.....	7
2.2.3	Environmental Impacts of Poultry Production	8
2.2.4	Management of poultry manure in Palestine	8
2.3	Biogas Technology.....	9
2.3.1	Biogas as a renewable energy source.....	10
2.3.2	History of using poultry manure for biogas production in the world	11
2.3.3	History of using poultry manure for biogas production in Palestine	12
2.4	Anaerobic digestion.....	13
2.4.1	Anaerobic digestion process	14
2.4.2	Microbiology of anaerobic digestion	15
2.4.3	Parameter affecting anaerobic digestion	17
2.4.4	Type of Feedstock.....	21

2.5	Biogas plant models	22
2.5.1	Popular biogas models	22
2.5.2	Reactor configuration.....	25
2.5.3	Selection of site and size of biogas plant	28
2.6	Biogas as energy source	28
3	<i>Chapter Three</i>	30
	Materials and methodology.....	30
3.1	Experimental methods.....	30
3.2	Site selection	30
3.3	Plant Design	31
3.3.1	Mixing unit.....	32
3.3.2	Digestion unit.....	33
3.3.3	Feeding systems	33
3.3.4	Reactor temperature	34
3.3.5	Reactor volume	34
3.3.6	Reactor material and protection.....	35
3.3.7	Agitators (Manual mixer)	35
3.3.8	Solar system	36
3.3.9	Gas storage.....	36
3.3.10	Pipework and valves	36
3.3.11	Solid waste collector tub	37
3.4	Laboratory analysis	38
3.4.1	Sampling procedure	38
3.4.2	Analysis of feed stock.....	38
3.4.3	Biochemical methane potential (BMP).....	42

3.4.4	Analysis of start up	43
3.5	Biogas production and composition analysis	44
3.6	Fertilizers analysis.....	45
3.6.1	Phosphorous content	46
3.6.2	Potassium content	46
3.6.3	Microbiological analysis	46
3.7	Energy production	47
3.8	Financial analysis	47
4	<i>Chapter Four</i>	50
	Result and Discussion	50
4.1	Continuous Anaerobic Digestion	50
4.2	Biogas generation.....	51
4.3	Digstate (slurry) characteristics.....	52
4.4	Continuous feeding	54
4.5	Bio-chemical Methane Potential (BMP).....	55
4.6	Biogas plant output.....	56
4.6.1	Biogas production and composition.....	57
4.6.2	Biofertilizer quality	58
4.7	Impact of the temperature on the anaerobic digestion	61
5	<i>Chapter Five</i>	64
	Biogas plant financial analysis.....	64
5.1	Introduction	64
5.2	Costs of biogas plants.....	65
5.2.1	Capital and installation costs	65
5.2.2	Operation and maintenance costs.....	66

5.3	Benefits of biogas plants	68
5.4	Cost – Benefit analysis	70
5.5	Economic viability of biogas production	72
5.5.1	Payback period.....	72
5.5.2	Net present value.....	73
5.5.3	The Benefit–Cost Ratio.....	73
5.5.4	Internal rate of return	74
6	<i>Chapter Six</i>	75
	Conclusions and Recommendations	75
6.1	Conclusions	75
6.2	Recommendations	76
7	References	78
